- Critical Thinking
- Problem Solving
- C#
- Unity

LANGUAGES

- Portuguese (Fluent, Native-Tongue)
- English (Advanced Level)

PROFILE

Hey! I'm Paulo Rodrigues, a Gameplay Programmer and Game Designer from Portugal! I've been developing games since I finished high school.

WORK EXPERIENCE

DuGuT Foundation 2021 - 2022
Sustainability Company

- Worked as a Gameplay Programmer and Game Designer for DuGuT's Metaverse Project.

EDUCATION

Degree - Digital Game Development 2022 - 2025
Instituto Politécnico da Maia

- Start of my portfolio and worked to become a Gameplay Programmer.

CTeSP - Multimedia and Digital Games 2019 - 2022
Instituto Politécnico da Maia

- Learned to work with multimedia tools and project organization tools.

Professional Course - Computer Systems Management and Programming Technician 2017 - 2019
Escola Secundária da Maia

- This course was where I started learning how to program and tried to learn more. I learned, on my own, to program in C# and that's how I made my first game, which was presented as my professional aptitude test for the course.

OTHER PROJECTS

DJD GameJam

- Developed a small Game Jam restricted to students of the Digital Game Development University Degree Course in Instituto Politécnico da Maia.
